LED Vapor proof
DB145 Series

STD
Specifications

 UPSHINE®

Introduction

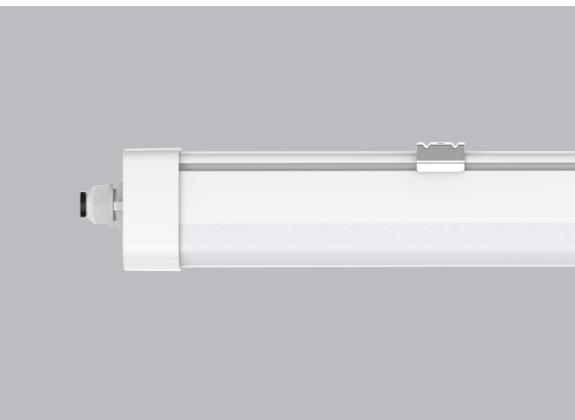

DB145 is a high quality LED Vapor proof with high luminous efficacy 150lm/w. With a reliable and robust housing structure (IK08 & IP65), this maximizes the endurance and contributes to its long lifetime. With its flexible installation accessories, it can install as surface mounting, pendant and splicing, which can be used in a wider applications. Three size options: 1200mm, 1500mm, 1800mm, it's an ideal replacement for traditional fluorescent Vapor proof.

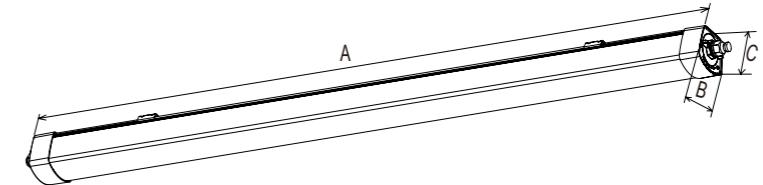

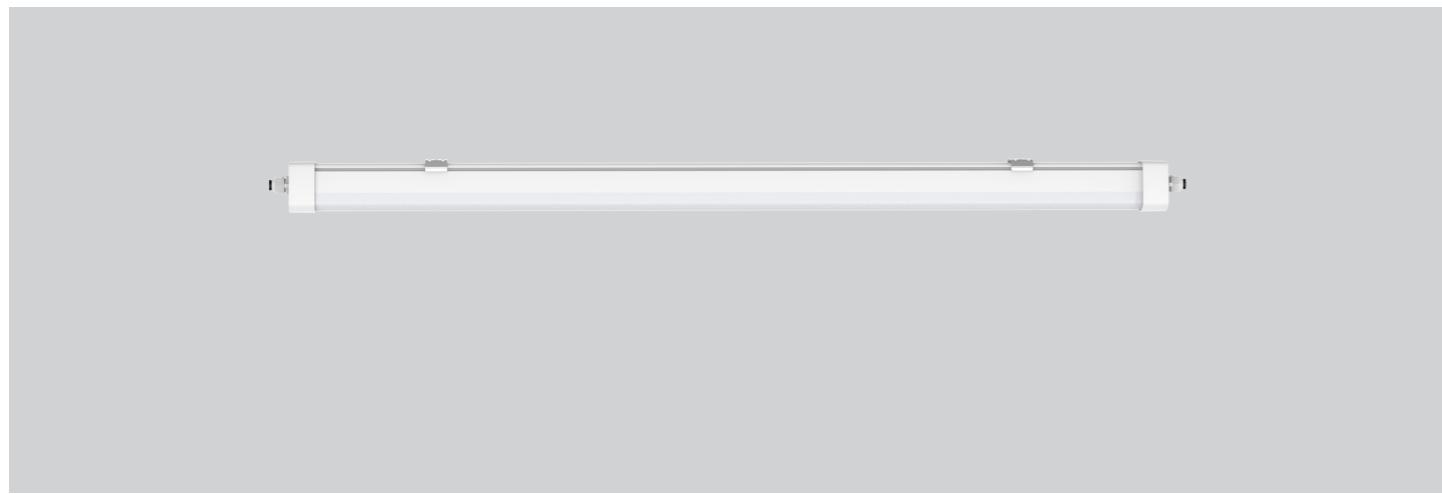

Features

- Compact design, suitable for both indoor and outdoor applications.
- IP65 waterproof, IK08 impact protection.
- Lifespan: approx. 50,000 hours.
- End caps: made of shockproof polycarbonate (PC).
- Flexible installation through sliding mounting bracket.
- Splicing, Sensor, Emergency and interchangeable CCT available.
- Tool free mains cable installation on both sides through twist lock fastener cover at both sides.

Application Areas

This linear fixture is widely used in shopping mall, office, car park, station, home.

Instructions for automatic test option

1. Once the unit is powered up it will automatically initiate a self test and diagnostics as follows:

- Every 4seconds:Check for battery disconnection,charger board fault,lamp failure and transformer failure.
- Every month:Perform a 3minute duration test.
- Every year:Perform a 1 Hour or 3 Hours duration test.

All test functions are factory preset and do not need field adjustment.

3. Dual Colour Indicator LED Status Meanings

2. Dual Colour Indicator LED Status Mean

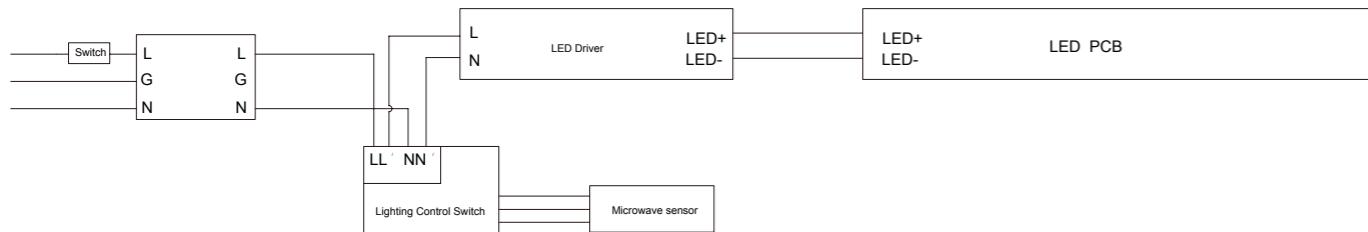

•	One flash, 4 second pause	Battery not connected
• •	Two flashes, 4 second pause	Low battery voltage
• • •	Three flashes, 4 second pause	Charger board fault
• • • •	Four flashes, 4 second pause	Transformer fault
• • • • •	Five flashes, 4 second pause	LED lamp fault

NOTE: After repairing a service fault press and hold the test button for 2 seconds to reset the flashing indicator light to green.

3 Manual Test

Press test button once	30 second duration test
Press test button twice within 2 seconds	3 minute duration test
Press test button 3 times within 2 seconds	30 minutes duration test
Press test button 4 times within 2 seconds	1 or 3 hours duration test

Detection area:

Detection area can be reduced by selecting the combination on the DIP switches to fit precisely each application.

Notice 1: The test is based on a height of 3m, the radius is the ground detect distance, which can be selected through the slide switch.

Notice 2: The detective range is measured by human body whose stature is around 1.6-1.7M with medium size and traveling speed is around 1.0-1.5M per second. If the stature, bodily form and traveling speed are changed, then the detective range will be changed accordingly.

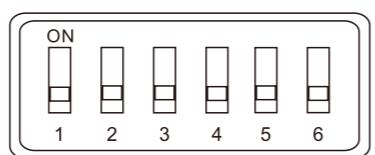

Notice 3: Test result will be highly influenced by test environment, the more open environment, the closer detect distance; the narrower environment, the longer detect distance. The detectormay do self-excitation in a narrow environment.

Installation Procedure

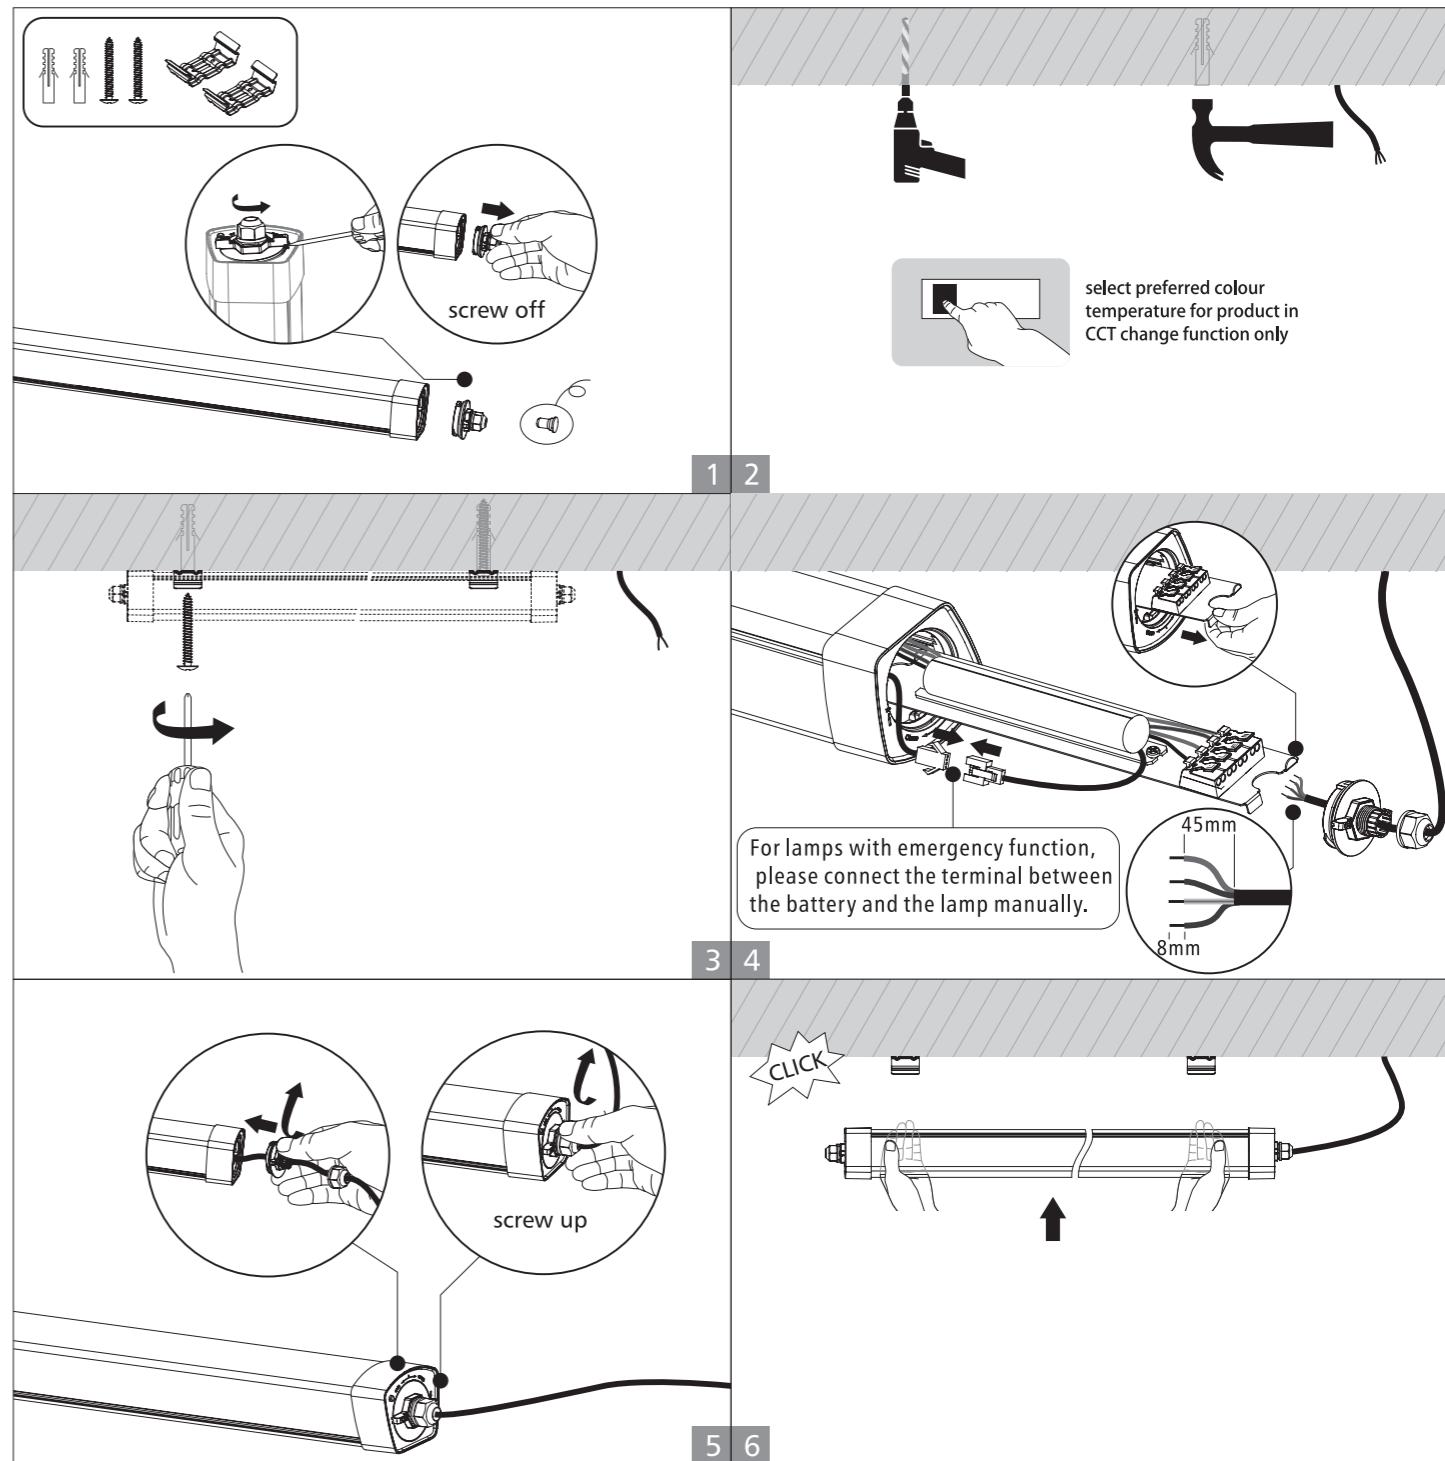

WARNING

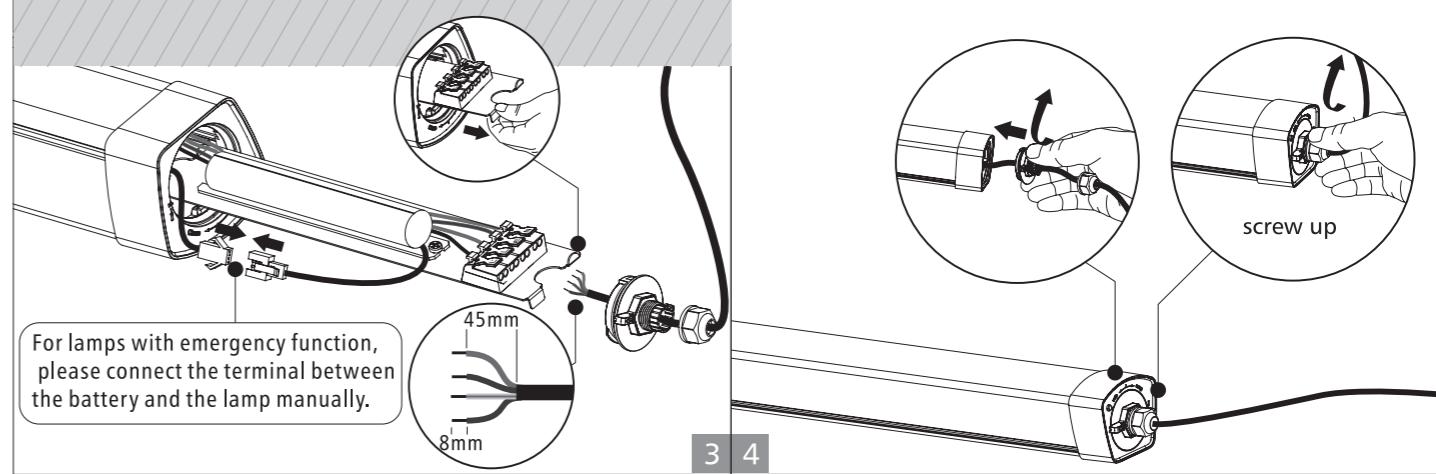

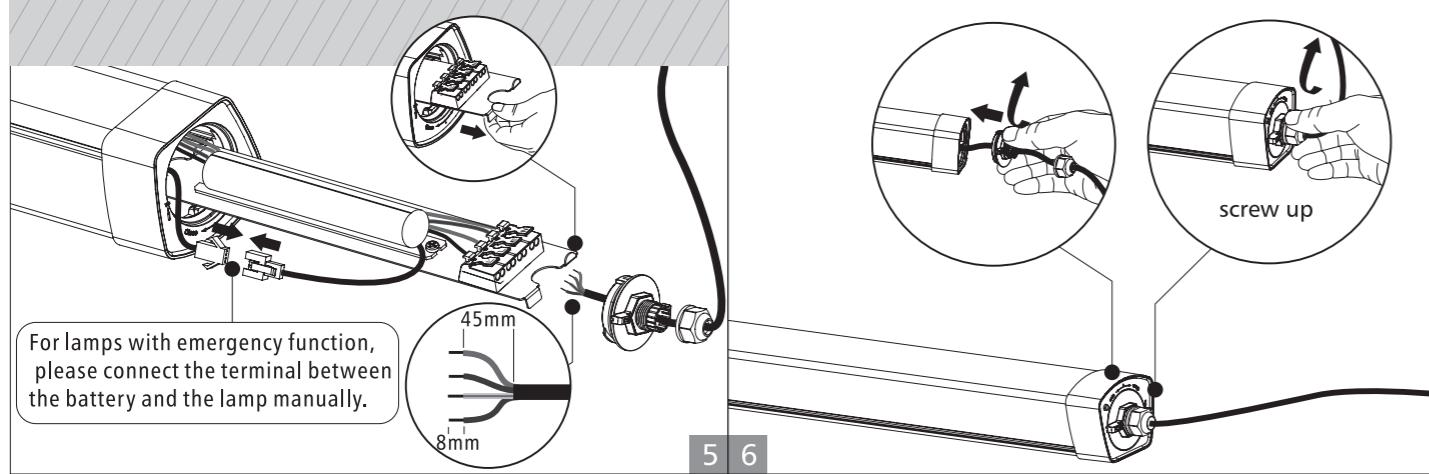

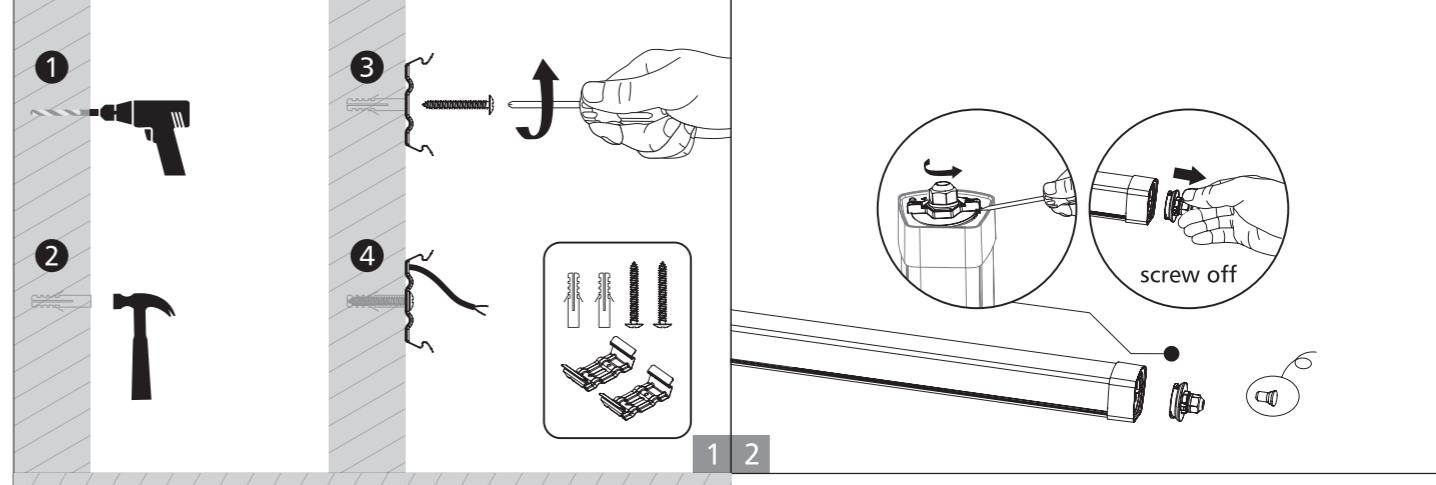

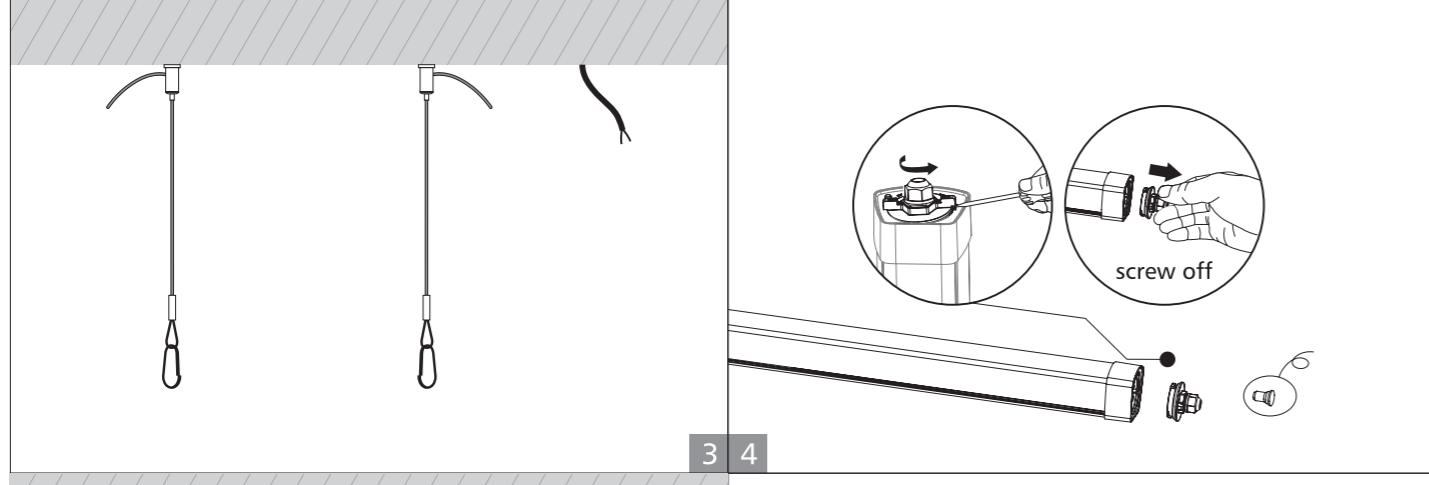

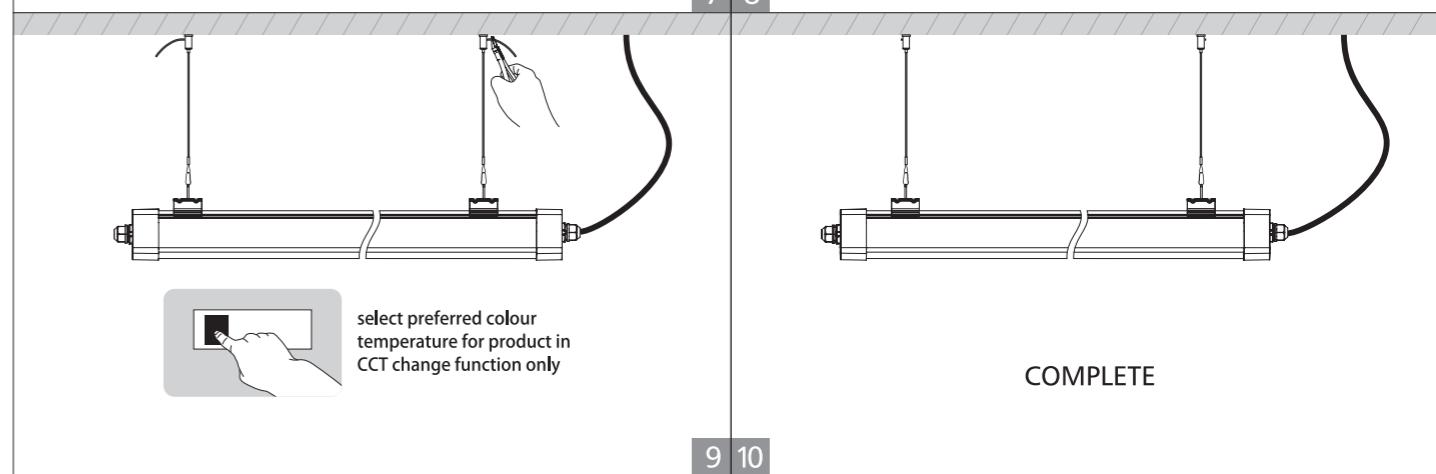

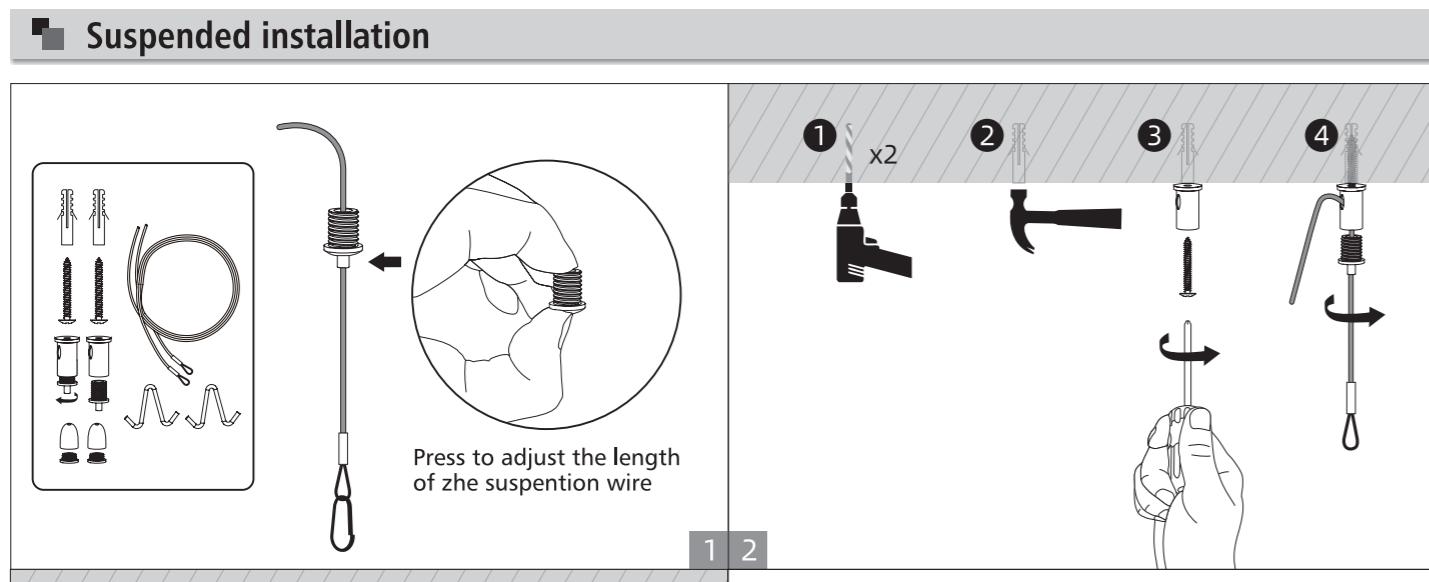

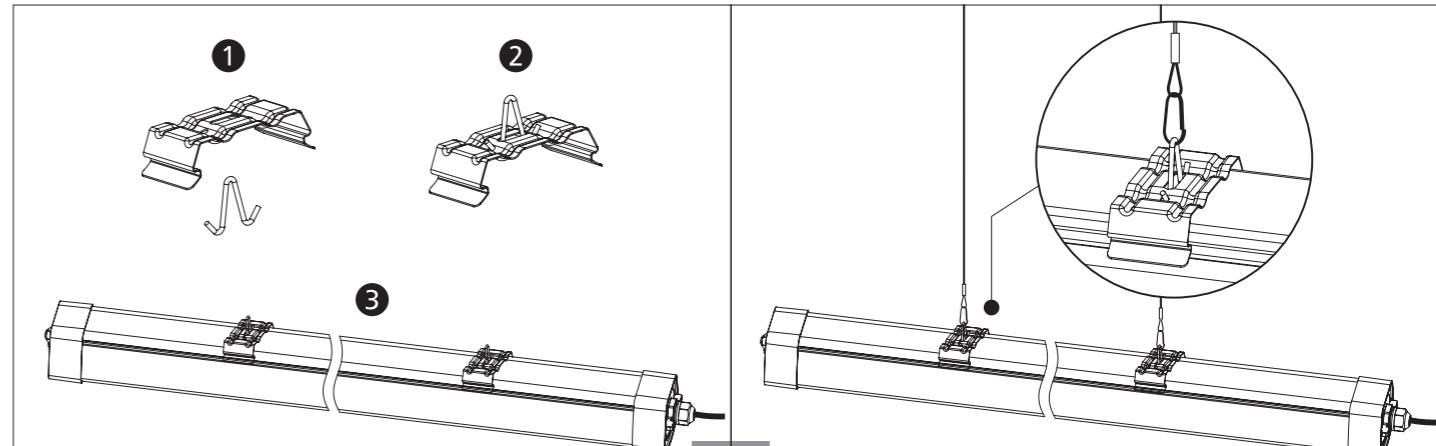

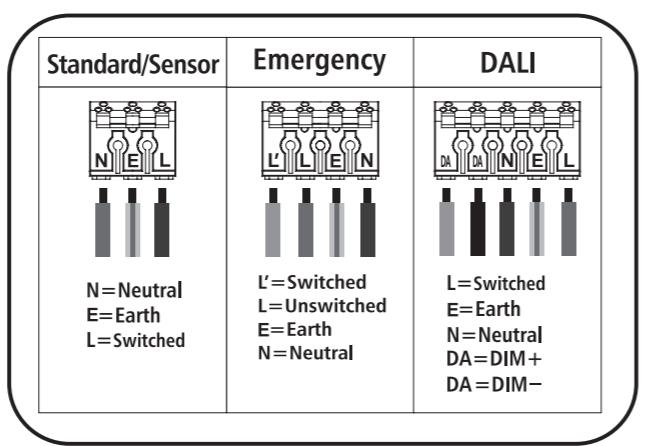

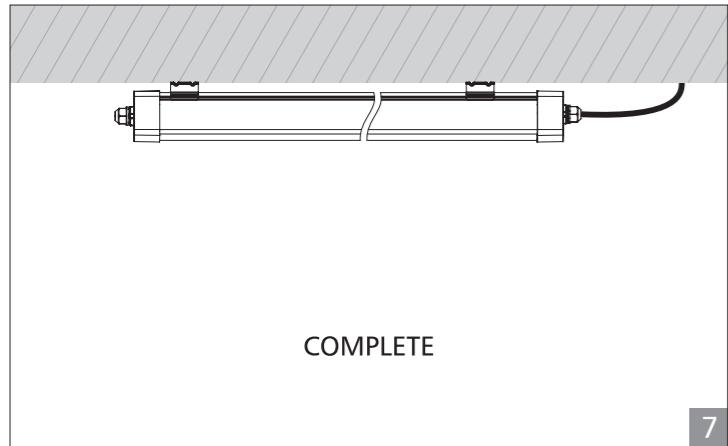

1. Switch off before installation.
2. Switch on only after complete installation and examination of the circuit.
3. Professional electrician for installation and maintenance only.

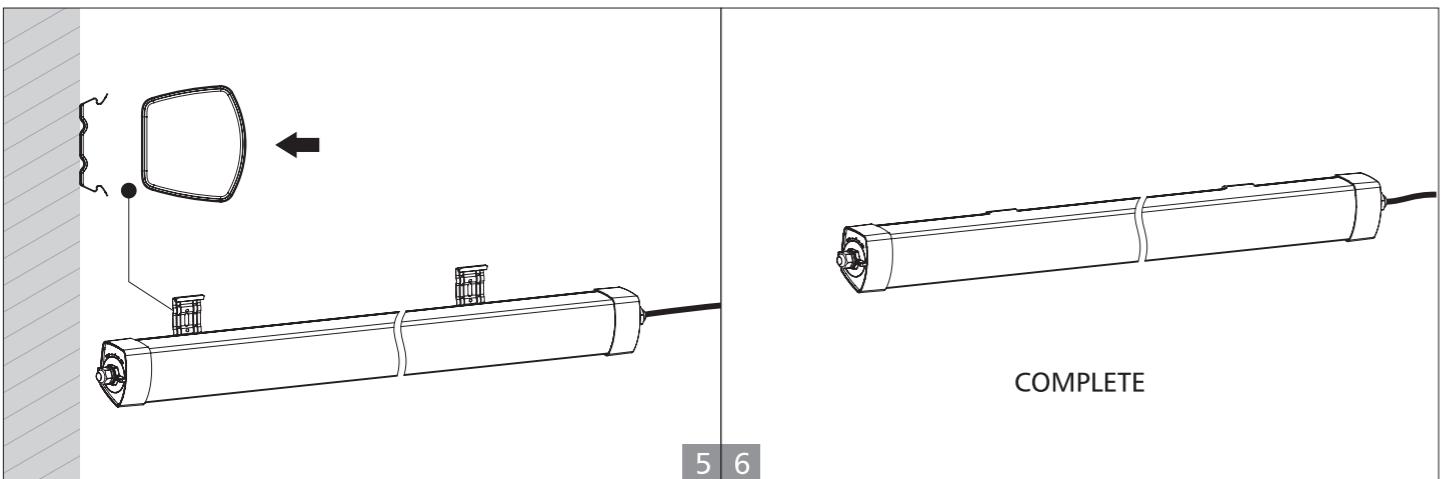

Turn Off power supply before starting any installation. Read instructions & check you have all the tools & accessories to complete the installation correctly.
