Dimmable

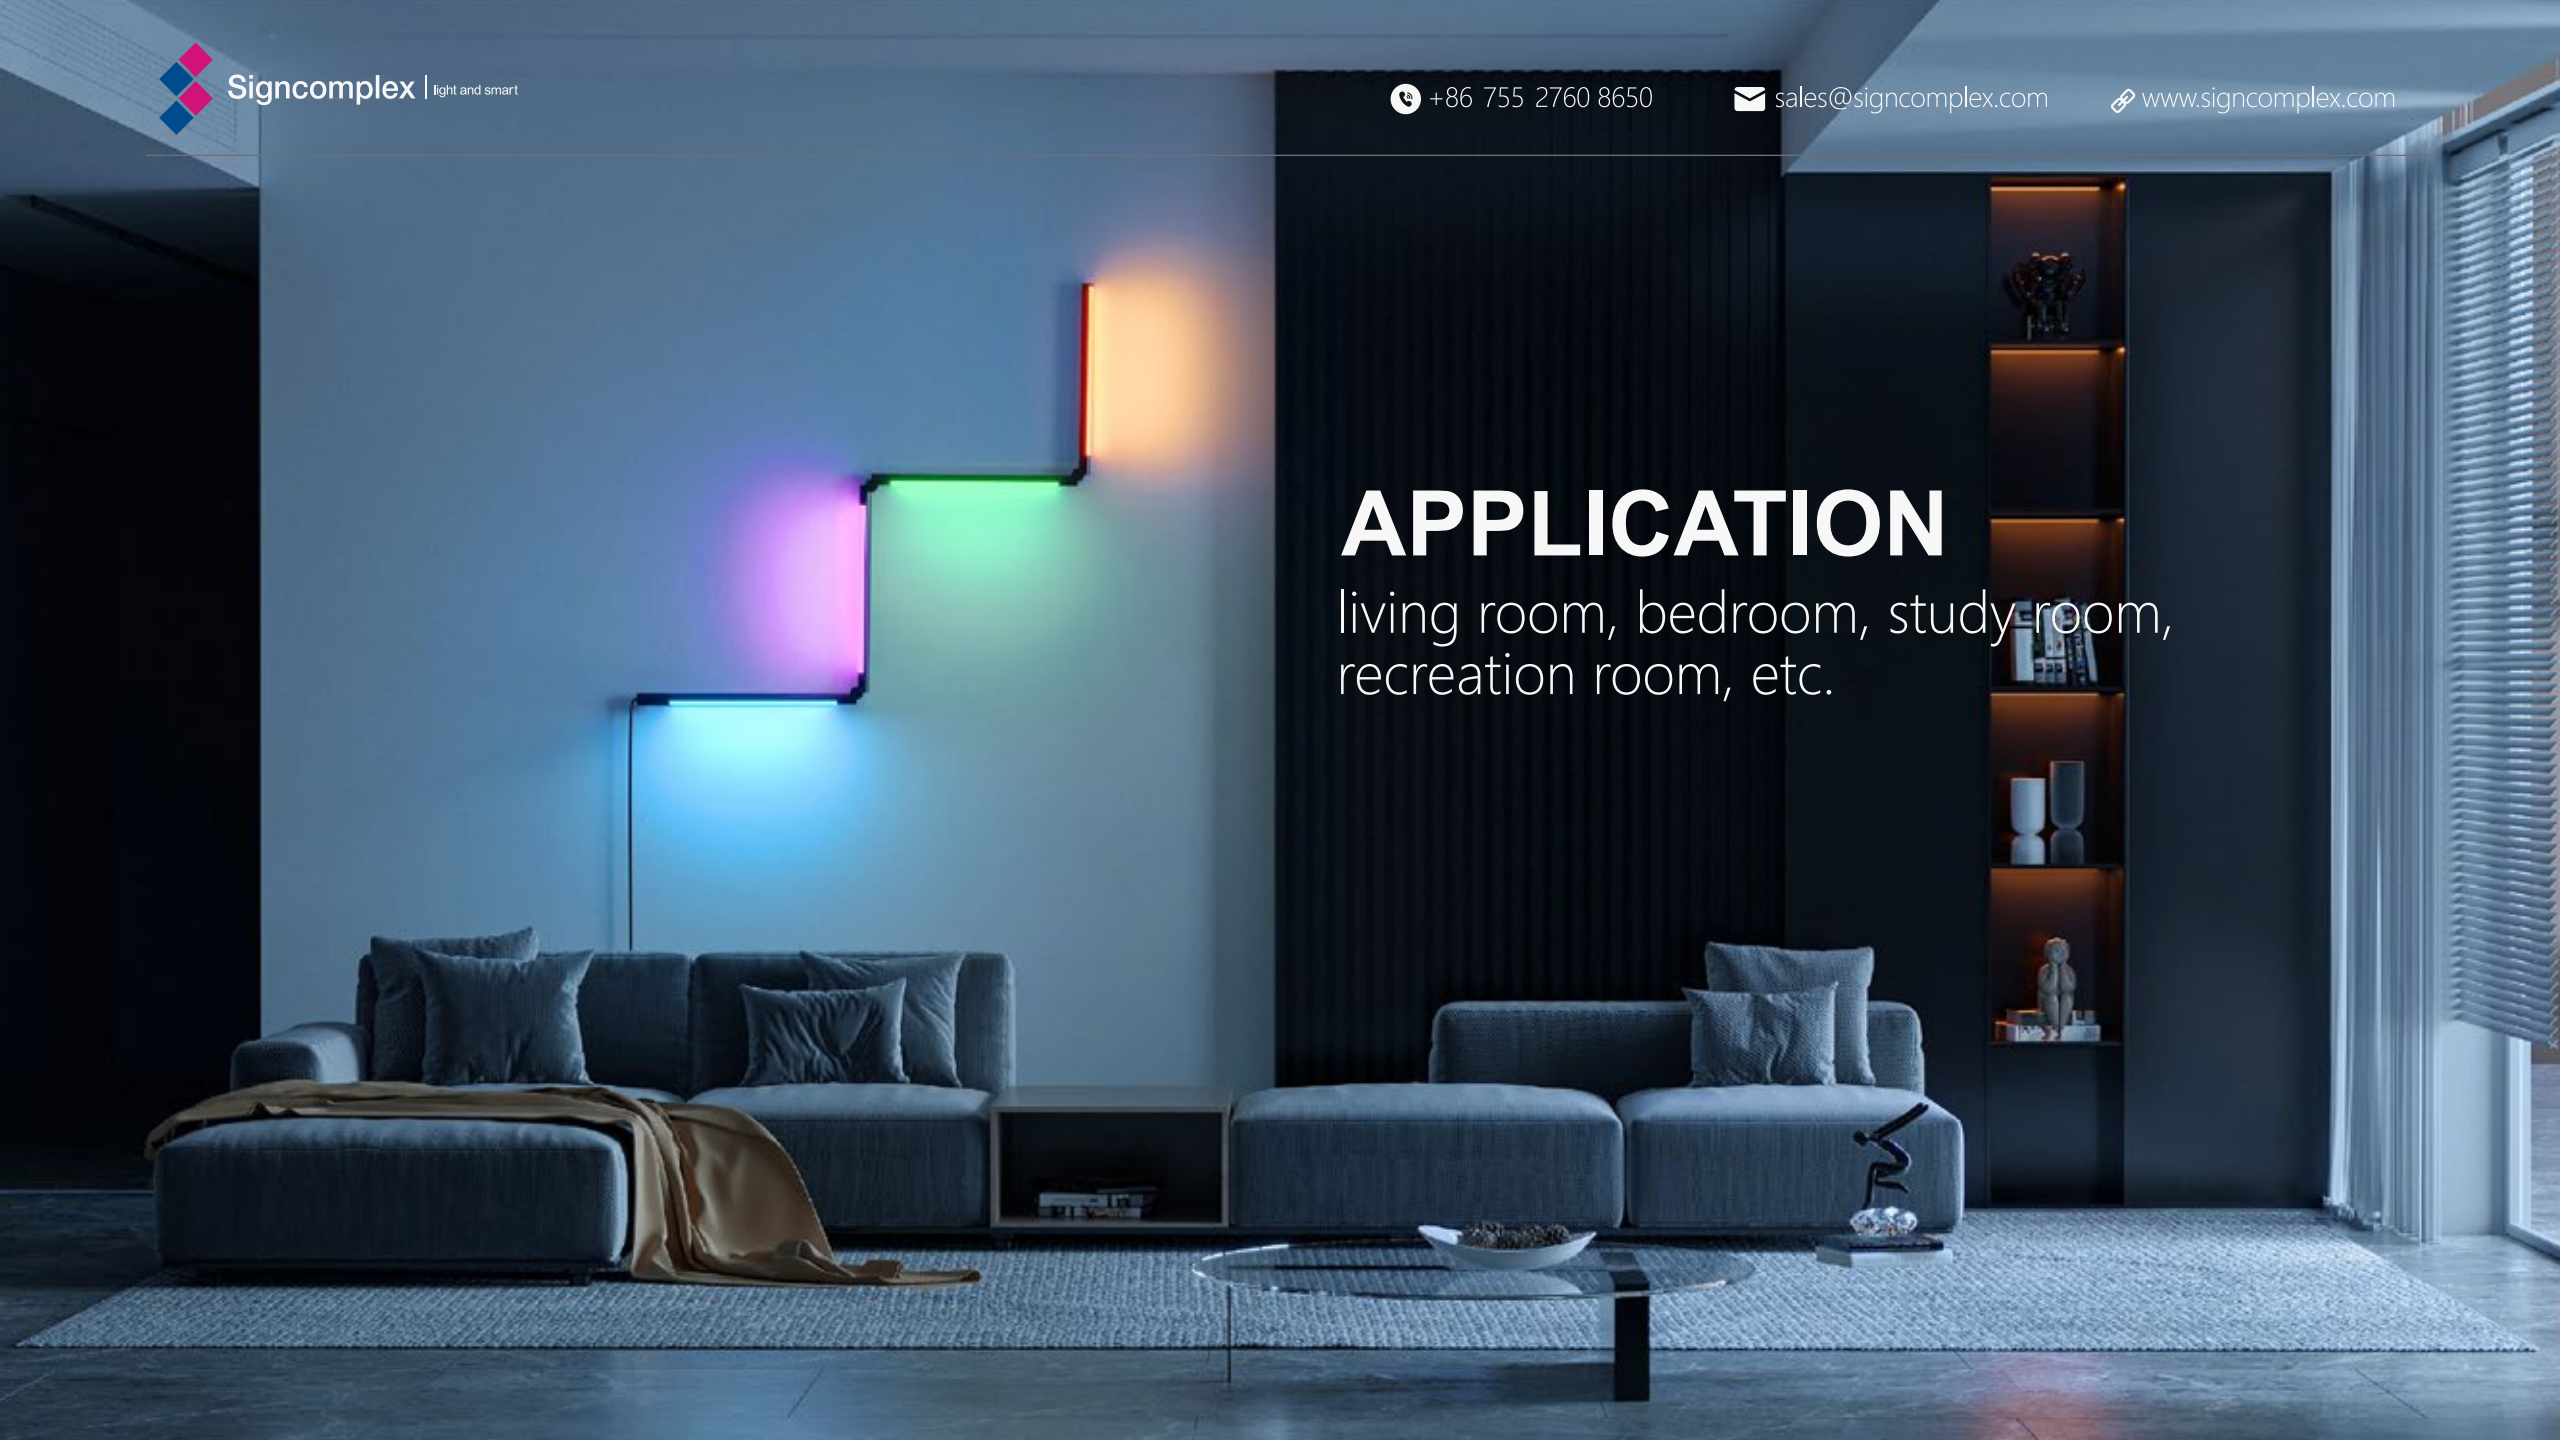

APPLICATION

living room, bedroom, study room,
recreation room, etc.

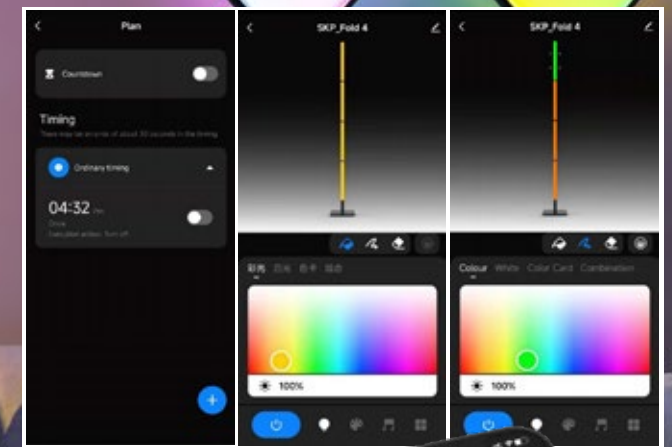

APPLICATION

living room, bedroom, study room,
recreation room, etc.

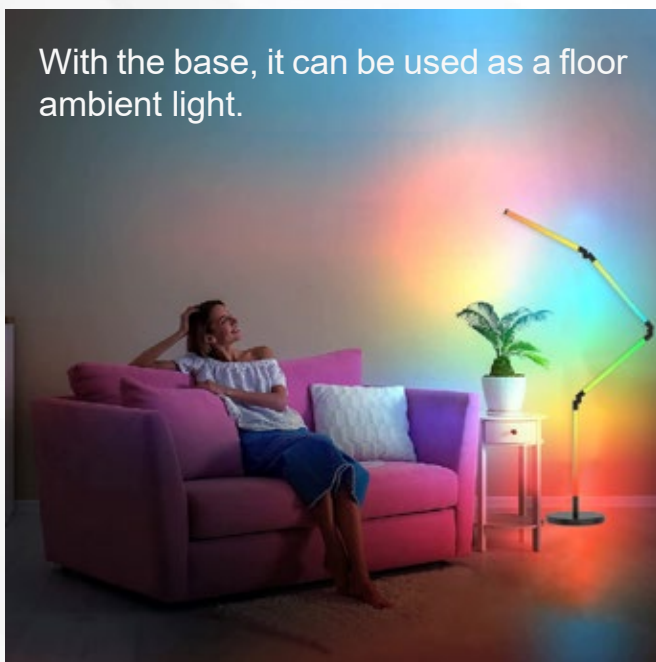

CONTROL MODE

TUYA WIFI+Bluetooth, support Alexa, google assistant, remote control + controller

ONE LIGHT FOR MULTIPLE USING SCENERIOS

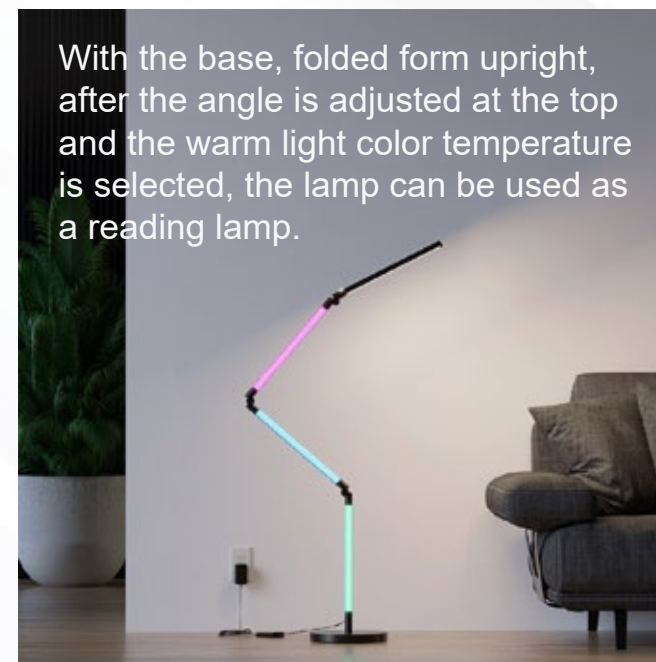

With the base, it can be used as a floor ambient light.

The lamp posture can be adjusted according to the customer's preference, which can be hung on the wall as wall ambient light

With the base, folded form upright, after the angle is adjusted at the top and the warm light color temperature is selected, the lamp can be used as a reading lamp.

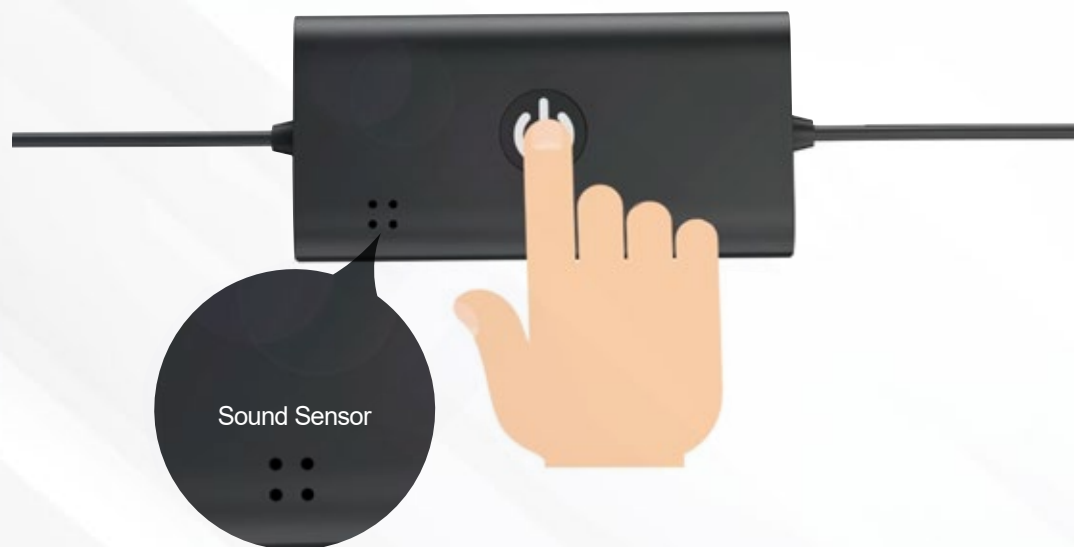

APP CONTROL

The lamp is composed of four light modules, each luminous module can be operated by APP and you can DIY various colors.

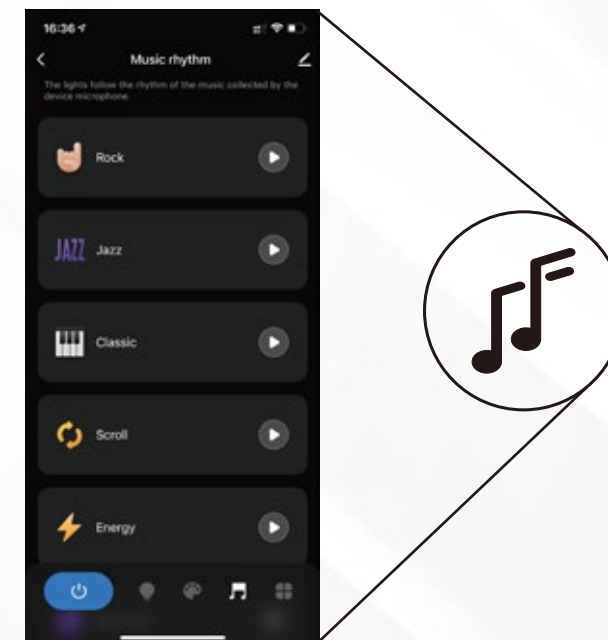

CONTROLLER

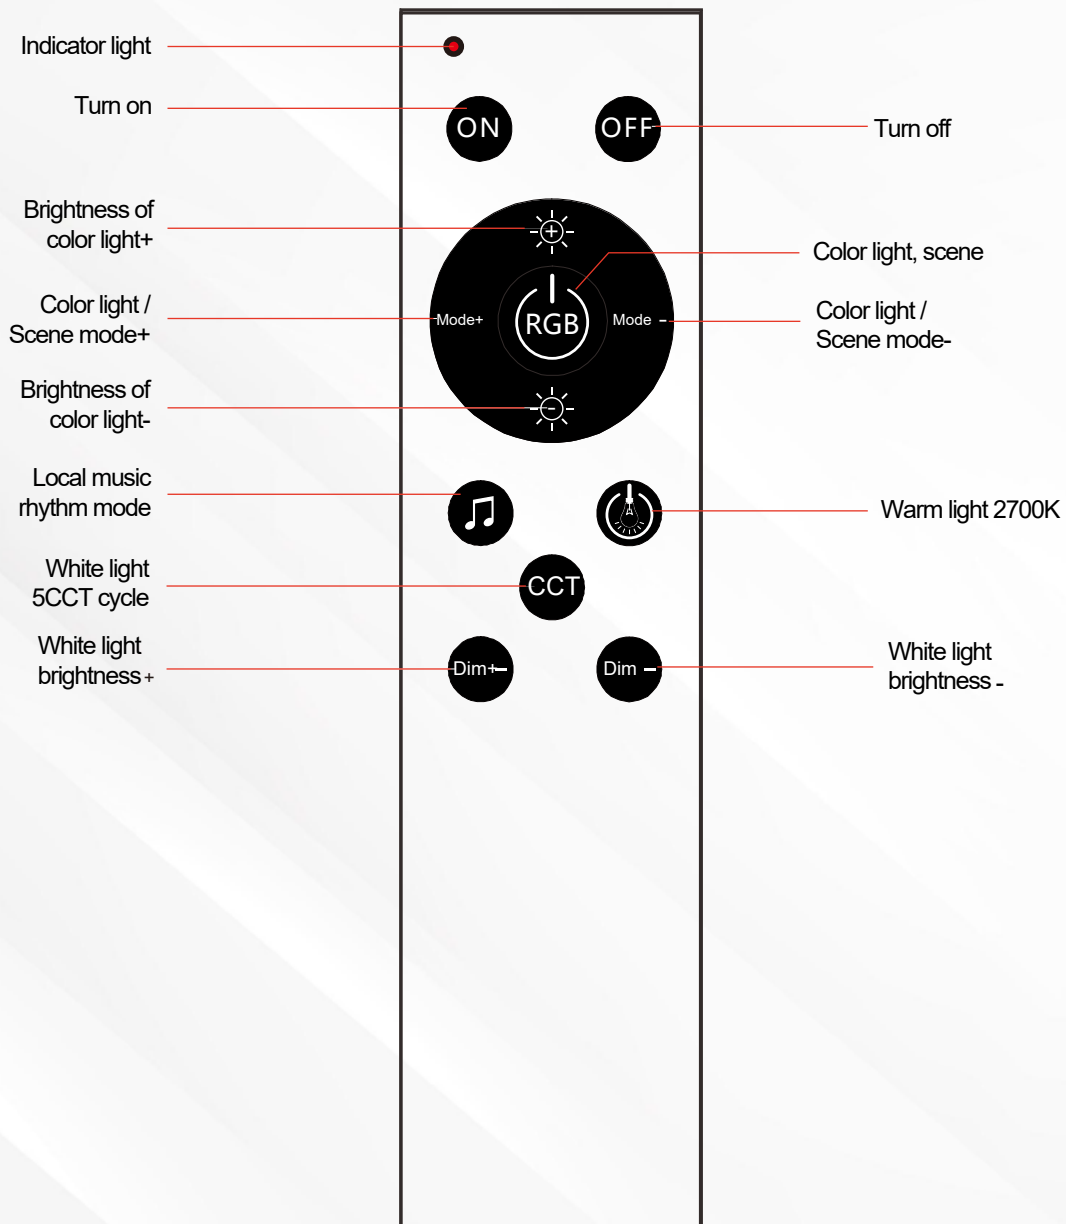

Long press 5 seconds: folding light flashes red light (waiting for network distribution)

LOCAL MUSIC MODE

rock, jazz, classic, scroll, energy, frequency spectrum, etc and sensitivity can be adjusted.

REMOTE CONTROL (optional)

Remote control pairing method: Within 20 seconds of the adapter being powered on, long press the ON button on the remote control for 5 seconds, the remote control will be paired/cleared. The light will flash 3 times fast for successful pairing and 5 times slow flashing for successful clearing pair.

The entire lamp consists of 4 luminous modules. Each module can be rotated horizontally up to 270° and swung vertically up to 180° . The positioning does not require external tools. The internal rotating shaft part adopts a special metal hinge commonly used in laptops, providing moderate and delicate damping, allowing for adjustment to any angle.

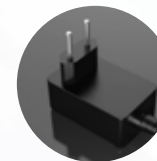

PC light mask, anti-aging&yellowing,
frosted surface, soft light output.

Built-in dedicated 301 stainless steel metal
damping rotating shaft, with stepless angle
rotation and no need for external tools.

The lamp pole is made of aviation
aluminum alloy AL6063, which makes
it lightweight yet sturdy and rust-resistant
